Please join the Lucketts Community Center Advisory Board, Piedmont Environmental Council, and Virginia Master Naturalists for a workshop to learn the facts about Limestone Geology—also known as Karst. Land and home owners will hear from a panel of experts who will explain what Karst is, its relationship with water, its impact on development, and what that means for you.

Panelists :

Dr. Malcolm Field, Hydrogeologist, National Center for Environmental Assessment, USEPA
Andy Forrest, P.G., Forrest Environmental Services
Alison Teetor, Clarke County Natural Resource Planner

Workshop Agenda:

6:30-7pm View Informational Booths & Resources
7:00-7:15pm Introductions
7:15-8:15pm Panel Presentations
8:15-8:45pm Question & Answer Session
8:45-9:00pm Wrap-Up
