RE: I-66 EB & WB Superstructure Replacement over Broad Run (0066-030-543 and DHR File 2023-0072)

Dear Mr. Ezell,

The Piedmont Environmental Council concurs with Fauquier County's recommendations to minimize the size and scale of the proposed replacement bridges, avoid damage to identified properties and natural features within the Area of Potential Impact during construction, and the use of materials consistent with the building materials and natural features of the immediate area. We believe these are sound recommendations that would help preserve the unique setting and cultural landscape characterized by the Broad Run-Little Georgetown Rural Historic District (030-5514) and the Chapman's/Beverly Mill Historic District (076-5311).

Please feel free to contact me with any questions.

Sincerely,

Kevin Kask, AICP
